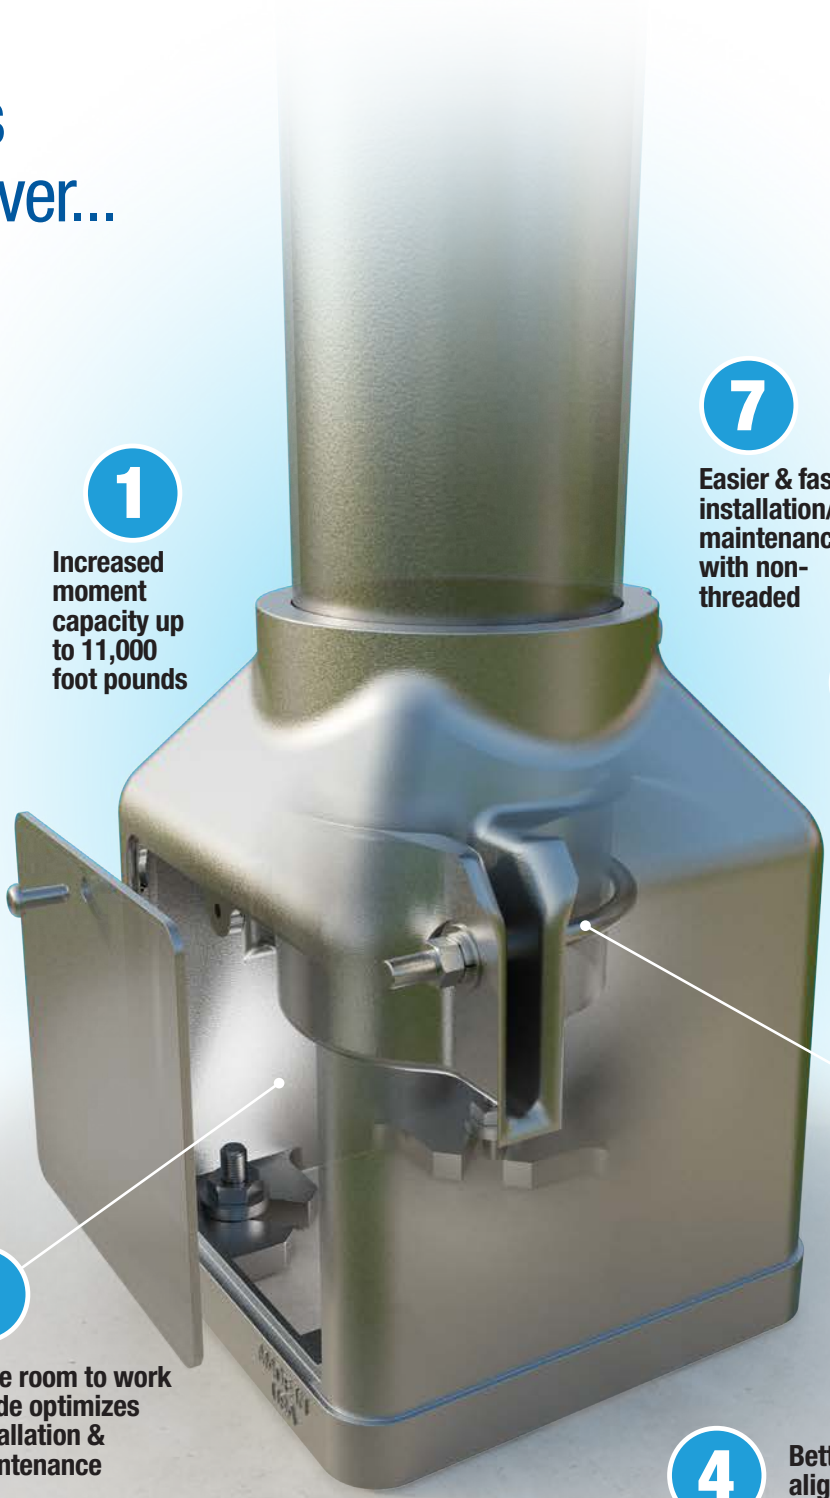
Compact Base

PELCO SOLUTIONS
FAMILY OF BRANDS

Pelco's NEW Compact Base is ***stronger*** than ever...

It offers an impressive **11,000 foot lbs of strength** and features an **EASY non-threaded design** to optimize your next upgrade. Our innovative engineering makes the NEW Compact Base your *rapid-install* solution. Plus, it has the industry-leading quality & flexibility you've come to expect from Pelco Solutions.



1 Increased moment capacity up to 11,000 foot pounds

2 More room to work inside optimizes installation & maintenance

3 Cost-efficient: Reuse poles & hardware to reduce waste

4 Better roadway alignment with slip-top design

5 Easy slip-top design allows poles to be cut and restabbed

6 Avoids seizing or stripping issues common to threaded designs

7 Easier & faster installation/ maintenance with non-threaded

PB-5237
Compact Base

It does not require a new pole, reducing downtime and replacement cost

Pelco Solutions

Compact Base

Outperforms industry leaders in strength and ease of use.

Features

- Withstands higher loads (up to 11,000 foot pounds), ensuring secure installation even in demanding environments
- Non-threaded connection: Stronger than competitors
- Allows easy reusability: Poles can be cut and restabbed without needing new hardware
- Easier and faster installation and maintenance due to the non-threaded design
- Allows damaged poles to be cut and restabbed, significantly simplifying repairs and reducing costs.
- Eliminates the need for threading at installation, allowing for faster and simpler setup
- Avoids seizing or stripping issues common to threaded bases, reducing installation frustration and failure rates
- Minimizes downtime and cost for replacements
- Simplified design means fewer points of failure and easier troubleshooting
- Compatible with existing pole sizes and configurations
- Designed to match existing configurations, bolt patterns, and accessories, enabling straightforward upgrades in the field
- Cost-efficient: Ability to reuse poles and hardware reduces waste and material costs
- Fewer specialized tools or skills needed to install or replace bases, making deployment quicker and less labor-intensive
